30. Axa lock _____

IELTS Listening Part 4

Questions 31–40
Complete the notes below.
Write **ONE WORD ONLY** for each answer.

Presentation on a Bee Disease

Background

Bee numbers are declining.

This may be due to changes in habitat and **31. _____** or to disease.

The decline has affected bee lifespans and the **32. _____** of locations they inhabit.

Bees are important as they are pollinators — they fertilize plants.

A significant amount of all our food, including fruit and **33. _____**, comes from pollinated plants.

An example of a pollinated non-food plant is **34. _____**.

Carrying out artificial pollination by hand, using a small **35. _____**, is not cost-effective.

Deformed Wing Virus — DWV

36. _____ transfers the virus between bees.

DWV has a harmful effect on bees' wings and **37. _____**.

It also affects cognitive functions, especially their memory.

Research into DWV

Aim:
To find out whether DWV is transmitted from honey bees to bumblebees, which are wild bees.

Research:
26 sites were identified, and infected honey bees and bumblebees were captured.

The virus strain found in both species was **38. _____**, but less frequent in bumblebees.

Conclusion:
The disease is probably transmitted from honey bees to bumblebees.

Suggested solutions

Encourage farmers to share data on infection rates.

Develop convenient **39. _____** that non-scientists can carry out.

Cut down on **40. _____**, which may affect bees' immune systems.
